## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 17-20, drawn to an image display system composed of a block having a plurality of pixels arranged in a matrix, classified in class 345, subclass 98.
  - II. Claims 21-22, drawn to transmitting image information employing a transmission system, classified in class 725, subclass 1.
  - III. Claims 1-16, drawn to an image display system having a television receiver, an information processing device, and a transmitter, classified in class 348, subclass 700.

The inventions are distinct, each from the other for the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claims in group I address controlling the image information depending on the type of image transmitted and received, while the claims in group II address controlling the pixels in a display. The subcombination has separate utility such as a computer display.
3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

inventions because the claims in group I address controlling the image information depending on the type of image transmitted and received, while the claims in group III address an accounting system wherein the service rate varies depending on the number of display pixels transmitted.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Carl I. Brundidge on November 26, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
